

What is claimed is

1. A bone-filling composition for stimulating bone-formation and bone-consolidation comprising
 - 5 1) 20~80 weight% of mixture containing CaSO_4 (90~99 weight%) and CaCO_3 , MgCO_3 , $\text{CaCO}_3 \cdot \text{MgCO}_3$ (1~10 weight%); and
 - 2) 80~20 weight% of viscous biopolymer.
- 10 2. The bone-filling composition for stimulating bone-formation and bone-consolidation as set forth in claim 1, wherein the composition comprises CaSO_4 98~99 weight%, CaCO_3 0.3~1 weight%, MgCO_3 0.3~1 weight% and $\text{CaCO}_3 \cdot \text{MgCO}_3$ 0.5~1 weight%.
- 15 3. The bone-filling composition for stimulating bone-formation and bone-consolidation as set forth in claim 1, wherein the viscous biopolymer is selected from a group consisting of
 - 20 carboxymethylcellulose, hyaluronic acid, chitosan, polyacrylic acids, polyvinyl ethers, polystyrenes, cellulose ethers, cellulose esters, starches and polysaccharides.

4. The bone-filling composition for stimulating bone-formation and bone-consolidation as set forth in claim 3, wherein the viscous biopolymer is carboxymethylcellulose.

5

5. The bone-filling composition for stimulating bone-formation and bone-consolidation as set forth in claim 1, wherein the ratio of calcium sulfate to viscous biopolymer is 50:50.

10

6. The bone-filling composition for stimulating bone-formation and bone-consolidation as set forth in claim 1, wherein the composition is a gel type.
